Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-15, drawn to a method for producing a matrix comprising ligands fixed to a carrier.

Group II, claims 16-19, drawn to a device comprising a ligand dispensing means, means for connecting a conductive carrier and dispensing means to an electric generator and means for positioning.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The claims are drawn to a method and device for producing a matrix wherein the matrix comprises at least one ligand fixed by electrochemical route to a carrier and wherein at least one element is used to dispense the ligand onto the conductive carrier.

The technical feature linking the inventions of Groups I and II appears to be that they all relate to electrochemical deposit of a ligand onto a conductive carrier to provide a matrix of ligands fixed on the carrier.

However, Balch et al (U.S. Patent No. 6083763, filed 31 December 1197) teach a method and device for electrochemical ligand deposit whereby a matrix of ligands fixed on the carrier is produced (i.e. electrophoretic or electro osmotic deposition, Column 15, lines 44-54).

Therefore, the technical feature linking the inventions of Groups I and II does not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1634

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
